

## Recycling at home

Recycling at home has always been such an essential part of our greens-school programme. Never has it been more relevant than now when we are all staying at home, keeping safe and only going out for essential shopping. It brings home to us in a very real way the meaning of what is truly essential in our lives, good health, happiness, and good will to all of our friends and family.

### Remember

- Travel "green" walk, run jog while keeping a safe distance
- Be "water wise" wash your hands well and often . Now we see the value of this precious resource
- Shop well. Lots of us are doing "once a week" shopping. It takes a little extra planning.
- Take a break. Try some of the old games like "hide and seek", "blind man's bluff" Board games are great fun as well as card games such as snap or matching

### Remember our slogan

Regards to my committee members

Keep up the good work

Mrs P. Greenan
